EDUCATION

Software Development Technician
Instituto Tecnológico de las Américas
01/2021 - 04/2024   *Santo Domingo, DR.*

WORK EXPERIENCE

QA Automation engineer
NewTech Software
06/2022 - Present   *Santo Domingo, DR.*

Descripción
- My role as an Automated Test Engineer focuses on developing and maintaining automation scripts in Java and Python, including API testing. I utilize tools such as Selenium and Robot Framework to execute efficient and well-documented tests. Additionally, I continually seek opportunities to optimize the testing process and ensure software quality.
